## PROJECTS

### **Online Leave Management System**

**Feb 2015 — April 2015**

Guide: Dr O.P.Vyas & Dr.Ranjana Vyas

Description: It is a web based project aimed to develop for the software professionals. People can login with their personnel credentials which are given by the company. After login they can apply for the leave after which the leave application will be sent to the required authorities.

Languages Used: PHP, Bootstrap, Java, JQuery.

### **Comparison between Flooding and Mobile Agents in unstructured peer to peer network**

**July 2015 — Dec 2015**

Guide : Dr. Vijay K Chaurasia

Description: In this project we implemented a unstructured base peer to peer network through connecting some computer's. After that we compare the performance of both the algorithms and displayed the statistical results of both algorithms.

Languages : C++.

Softwares : Netbeans.

## Expert System

Jan 2016 — May 2016

Guide: Dr. Vijay K Chaurasia

Description : It is a search expert system which helps a buyer to buy products by helping him showing prices of a product at different ecommerce portals, so that the buyer can directly go to the e-commerce portal at which it is available at best price. It also recommends products by taking the given query product and ratings as a source across all e-commerce portals.

Softwares used: Netbeans, Scrapy library(python), Selenium Webdriver, Jsoup libraries, JDK 1.8 libraries, OJDBC 14, Oracle Database Management System, Sql developer, HTML and JSP editors.

### ACCOMPLISHMENTS

- Won medals and trophies at state level Olympiads of Maths and Science.
- Won 1st and 2nd prize in Table Tennis at IIITA.
