Projects

Online Health Care System:

- **Description:** The Online Heath Care System is a platform where people are provided with many services like making appointments, paying bills ,updating their profiles, e.t.c.

   Tools Used: Wamp Server, Komodo Edit-8.0.

   Technology Used: HTML, Java-Script, CSS, Boot-Strap, PHP, JQuery and Sql.

   Instructor: Prof. OP.Vyas, Dr.Ranjana Vyas.

Web Page Classification(ACO):

- **Description:** The amount of information available on the web is huge and growing each year. As the web has grown, the ability to mine for specific information has become almost important as the web itself. So the goal of this project is to discover a good set of classification rules to classify the web pages based on their subject.

   Technology Used: Netbeans, Java, JDK 1.8 Libraries, AWT, Swing, BBC Datasets.

   Instructor: Prof. Vijay K. Chaurasiya.

Shopping Expert:

- **Description:** The buyer searches for the product by giving either name or prices. This expert system will show the results of the product which he is searching by comparing all the prices in different websites and suggests the product, not only that but it also suggests based on user ratings and seller ratings , it suggests the product where it is available. We also suggest the products which are in the same range by comparing the specs which the buyer is looking..

  Technology Used: Netbeans, HTML, JSP Editors (Notepad++), SQL Developer, Java, JSOUP Library(java), Python, Scrapy Library(python), Selinum Webdriver, JDK 1.8 Libraries, OJDBC14, Oracle Data Base Management System.

  Instructor: Prof. Vijay K.Chaurasiya.
